

Industrial and Commercial Air Handling Division

Aerovent has been manufacturing a wide variety of Air Handling Equipment since the 1950's. What started out primarily as Air Makeup Units for industrial facilities has now developed into an extremely versatile custom Air Handling Unit division. From our standard cataloged air makeup units to a fully custom air handler, our design engineers and variable manufacturing facility in Covington, Ohio can build just about any air handling equipment you may have in mind.

Aerovent will manufacture your custom air handling unit to meet your specific project requirements.

Aerovent engineers will design energy efficient and cost effective air handling units for industrial and commercial use. Aerovent has engineering and manufacturing capabilities that can match just about anything your project requires. We have manufactured and delivered custom units for the food and beverage, automotive, power generation, pulp and paper and water treatment industries. Many nationally recognized companies have purchased air handling units engineered and designed by Aerovent.
